Recorded sleep / time in bed

AI INTERPRETATION

The interruption is worth a closer look.

Your watch estimated 7 hours asleep and 30 minutes awake. You remember traffic waking you around 02:00 and feeling tired in the morning. That timing overlaps a recorded 20-minute awake period. One night cannot tell us what caused the tiredness.

AI interpretation may be wrong. Consider the original records and your own experience.

THE RECORDED SEQUENCE

Sleep timeline

Device-estimated stages

Stage labels come from the device. Missing intervals would remain gaps; they would not be counted as awake.

KEEP THE SOURCES IN VIEW

Evidence references

DEVICE RECORD

A 20-minute awake interval
The watch marked an awake period around the time you recalled.

Apple Watch / 02:00-02:20 (UTC+08)

YOUR ACCOUNT

Tired and unrefreshed
You recalled 7 hours asleep, one awakening, and traffic noise.

Saved answers / this sleep

UNCERTAIN

The cause is still open
The timing overlaps. It does not establish what caused the tiredness.

One night / no personal baseline

One thing to try next

A quieter-bedroom experiment

01

Make the room a little quieter.

Tonight, try closing the street-facing bedroom window before bed, if the room stays comfortable and ventilated, as a simple quieter-bedroom experiment.

WHAT THIS REPORT DRAWS ON

Selected interval	20 Sep, 23:15 to 21 Sep, 06:45 (UTC+08). One main sleep, with Apple Watch as the selected source.
Calculated values	Sleep intervals are merged without double-counting. Sleep efficiency is 420 / 450 minutes, rounded to 93.3%.
Your answers	7 hours recalled, 1 remembered awakening, traffic around 02:00, and feeling tired and unrefreshed.
Unavailable	Heart rate, HRV, breathing rate, and oxygen saturation were unavailable for this report. Missing measurements remain unknown.
Source handling	Imported records stay local. When AI is used, conversation text, selected facts, and bounded results are sent to the model provider you configure.

WHAT REMAINS OPEN

Limitations

- Device stages are estimates. No personal historical baseline or long-term regularity was calculated.
- Scoring rules have not yet been validated. No overall or dimension score is provided.
- Some answers were skipped or unknown. AI interpretations and suggestions may be wrong.
- This report does not provide a medical diagnosis or a treatment recommendation.
